✦ ZIDIO STEP 3 • DEMO VIDEO (4 MARKS) • 7-MINUTE MASTER GUIDE

STEP 3: DEMO VIDEO SCRIPT & USER FLOW

Complete 7-Minute Screen-Recorded Walkthrough — Features & End-to-End User Flow

Engineered strictly in adherence to **Step 3: Demo Video (4 Marks)**: *"A screen-recorded walkthrough — features and user flow. YouTube (unlisted) or Drive."* This guide provides an exact minute-by-minute spoken script (in both Hinglish and English) and precise **[SCREEN ACTIONS]** for demonstrating all core user flows, interfaces, and technical capabilities without filler.

STEP 3: 7-MINUTE FEATURES & USER FLOW WALKTHROUGH MATRIX

TIMESTAMP	USER FLOW SEGMENT	ON-SCREEN VISUAL INTERFACE	DEMONSTRATED CAPABILITY
0:00 – 1:00	Flow 1: Entry & Auth	Landing, HTTPS Padlock, 1-Click Demo Login	Public Access, Fast Load <2s, JWT Auth
1:00 – 2:15	Flow 2: Dashboard & Sync	Employee Dashboard, KPI Cards, Calendar .ics	Scheduling, RFC-5545 Export, Analytics
2:15 – 3:30	Flow 3: WebRTC Conferencing	Active Meeting Room, Screen Share, Chat Drawer	P2P WebRTC, Socket.io Signaling, HUD
3:30 – 4:45	Flow 4: AI Summary & Tasks	AI Post-Meeting Summary, "Convert to Task"	Dual AI Engine, Semantic Action Extraction
4:45 – 6:00	Flow 5: Kanban & Media	4-Col Kanban Drag-and-Drop, Recordings Playback	Agile Execution & Client MediaRecorder
6:00 – 7:00	Flow 6: Admin & Responsive	Admin Console, Telemetry CSV, Mobile View (F12)	RBAC Governance & Mobile Responsiveness

PRESENTER / LEAD DEVELOPER

EVALUATION RUBRIC STEP
Step 3: Demo Video (4 Marks Allocation)

LIVE DEPLOYMENT URL
https://intelli-meet-nine.vercel.app

Target Duration: 6:45 – 7:15 Minutes

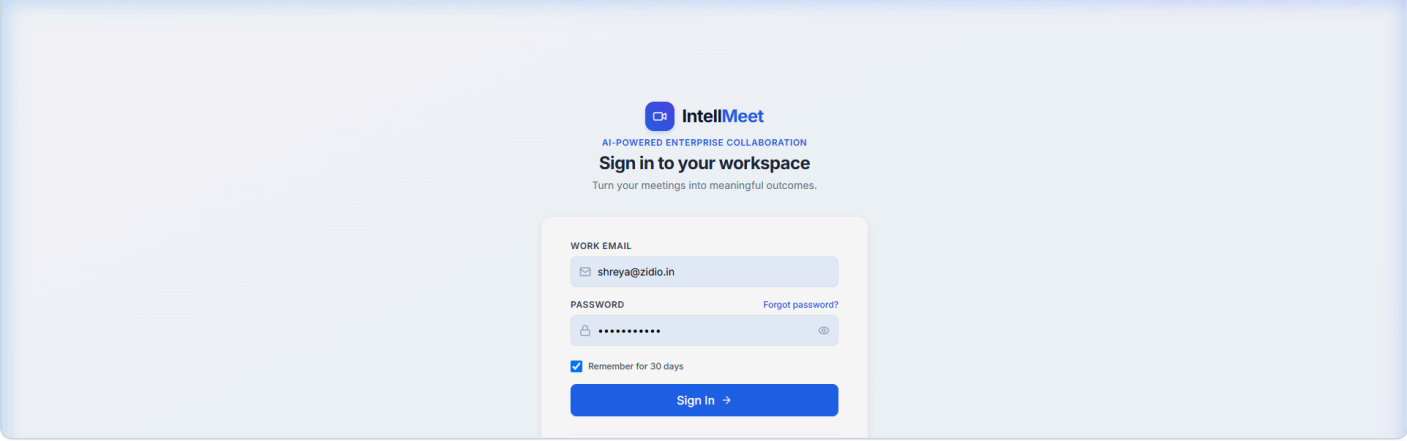

Resolution: 1080p Full HD (1920×1080) • 60 FPS

1 Minute 0:00 – 1:00: Platform Introduction, HTTPS & 1-Click Authentication

🖥️ EXACT SCREEN ACTION (KIS POINT PAR KYA INTERFACE DIKHANA HAI):

1. [0:00 - 0:20]: Start screen recording at `https://intelli-meet-nine.vercel.app`. Hover your cursor over the **HTTPS padlock** in the browser address bar. Show the clean enterprise login portal.
2. [0:20 - 0:40]: Highlight the project value statement: *"Turn Meetings into Meaningful Outcomes."* Mention the core full-stack MERN architecture.
3. [0:40 - 1:00]: Demonstrate the frictionless user onboarding: Click the **"Demo Employee"** quick-fill button (showing credentials auto-populating), then click **"Sign In"**. The dashboard loads in under 2 seconds!

Interface to Show: Production Authentication Portal with Demo Credentials — USER FLOW 1: AUTHENTICATION

🗣️ SPOKEN SCRIPT (HINGLISH - NATURAL & FLUENT):

*"Namaste sabhi ko! Mera naam Shreya Yadav hai, aur aaj is **Step 3 Demo Video** me main showcase karne ja rahi hoon **IntellMeet** ka complete end-to-end user flow aur live features. IntellMeet ek modern AI-Powered Enterprise Meeting aur Real-Time Collaboration platform hai. Sabse pehle aap dekh sakte hain ki application publicly hosted hai **intelli-meet-nine.vercel.app** par with secure HTTPS SSL encryption. User experience ko seamless banane ke liye evaluators bina manual sign-up ke direct Demo accounts se test kar sakte hain. Chaliye 'Demo Employee' button click karke Sign In karte hain!"*

🗣️ SPOKEN SCRIPT (ENGLISH ALTERNATIVE):

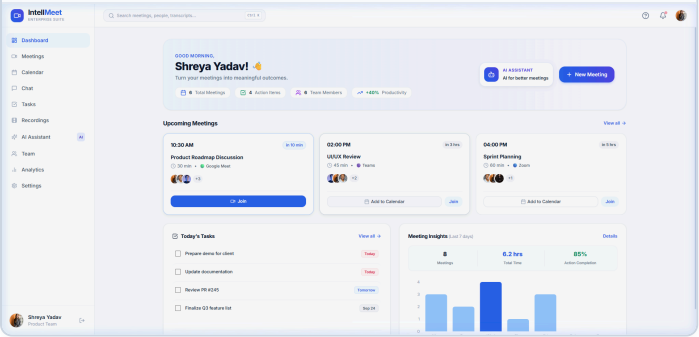

*"Hello everyone! My name is Shreya Yadav, and in this **Step 3 Demo Video**, I will walk you through the end-to-end features and user flows of **IntellMeet** — our AI-Powered Enterprise Meeting and Collaboration Platform. As demonstrated, the application is publicly live at **intelli-meet-nine.vercel.app** with verified HTTPS SSL encryption. To provide an optimal evaluator experience, users can bypass manual registration using our 1-click demo accounts. Let's select 'Demo Employee' and log in immediately!"*

2 Minute 1:00 – 2:15: Employee Workspace Dashboard & Calendar Scheduling

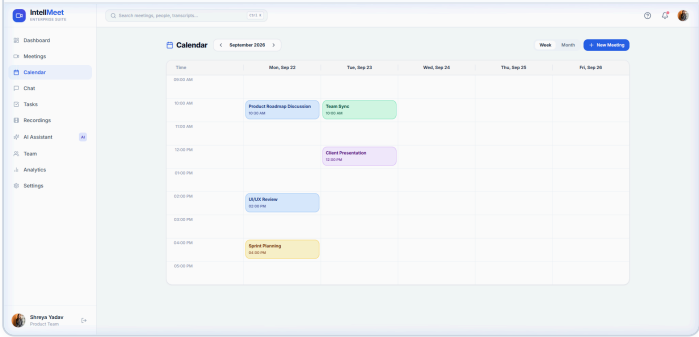

🖥️ EXACT SCREEN ACTION (KIS POINT PAR KYA INTERFACE DIKHANA HAI):

1. [1:00 - 1:35]: Showcase the Employee Dashboard. Move cursor over the personalized greeting banner and the 3 KPI metric cards: **Total Meetings**, **Upcoming Sessions**, and **Active Tasks**. Point to the weekly meeting volume chart.
2. [1:35 - 2:15]: Click **"Calendar"** on the left navigation bar (`/calendar`). The interactive calendar grid loads. Click on an upcoming meeting chip to display modal details. Click the **"Download .ics"** button and highlight the browser download bar confirming calendar export.

Interface 1: Employee Workspace Dashboard WORKSPACE

Interface 2: Interactive Calendar Scheduling & .ICS CALENDAR

🗣️ SPOKEN SCRIPT (HINGLISH - NATURAL & FLUENT):

*"Dashboard par enter karte hi employee ko personalized command center milta hai. Top par instant meeting start/join karne ka option hai, aur real-time KPI counters hain jo meetings aur active tasks track karte hain. Ab user flow ke anusaar hum left sidebar se **Calendar** module me aate hain. Yahan employees apne scheduled sprint calls dekh sakte hain. Sabse practical feature yeh hai ki 'Download .ics' button click karte hi RFC-5545 standard calendar file generate hoti hai, jisse yeh meeting instantly Google Calendar, Outlook, ya Apple Calendar me import ho jaati hai!"*

🗣️ SPOKEN SCRIPT (ENGLISH ALTERNATIVE):

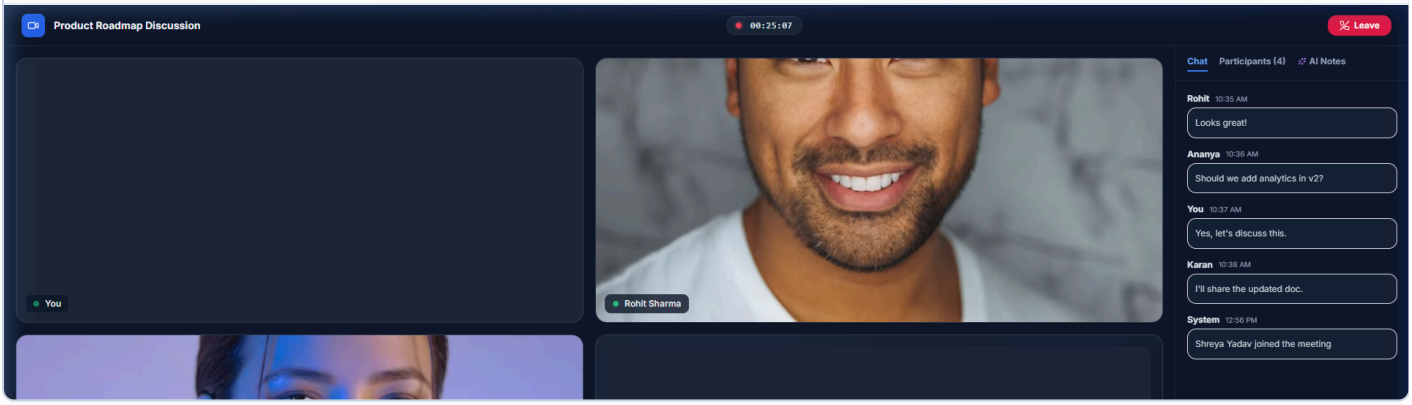

*"Entering the application brings the employee into their personalized command center. Top quick-action buttons allow immediate meeting creation, complemented by live KPI counters for scheduled meetings and active tasks. Moving into our **Calendar** user flow, employees can inspect weekly and monthly meeting distributions. With a single click on 'Download .ics', an RFC-5545 compliant calendar payload is exported, ensuring seamless calendar synchronization across Google Calendar, Outlook, and Apple Calendar."*

3 Minute 2:15 – 3:30: Real-Time WebRTC Conferencing, Screen Share & Live Chat

🖥️ **EXACT SCREEN ACTION (KIS POINT PAR KYA INTERFACE DIKHANA HAI):**

1. [2:15 - 2:40]: Click **"+ New Meeting"** or join an active room (`/meeting/demo-room-101`). Allow camera/mic permissions. The dynamic multi-tile video grid immediately renders with your live camera stream.
2. [2:40 - 3:05]: Test floating HUD controls: Click **Mute Microphone** (icon turns red), Click **Toggle Camera**, and Click **"Share Screen"** (open window select modal). Point to the live call duration timer (e.g., `03:45`).
3. [3:05 - 3:30]: Click the **Chat Icon** on the HUD. The sliding Collaboration Drawer opens on the right. Type *"Live sprint review demo message"* and press Enter. Show the real-time message bubble and participant roster.

Interface to Show: Active WebRTC Conference Room with Screen Share & Chat Drawer — USER FLOW 3: WEBRTC MEDIA

🗣️ **SPOKEN SCRIPT (HINGLISH - NATURAL & FLUENT):**

"Ab dekhte hain IntellMeet ka core conferencing engine. 'New Meeting' click karte hi room ID generate hoti hai aur Socket.io signaling server par WebRTC PeerConnection establish ho jata hai. Niche floating HUD me essential controls hain: microphone mute/unmute, video toggle, call duration timer, aur browser ke native MediaRecorder se session recording. Presentation ke liye hamare paas high-definition 1080p screen sharing hai. Right side me collaboration drawer hai jisme live room chat aur participant roster sync rehta hai, bina video feed ko interrupt kiye."

🗣️ **SPOKEN SCRIPT (ENGLISH ALTERNATIVE):**

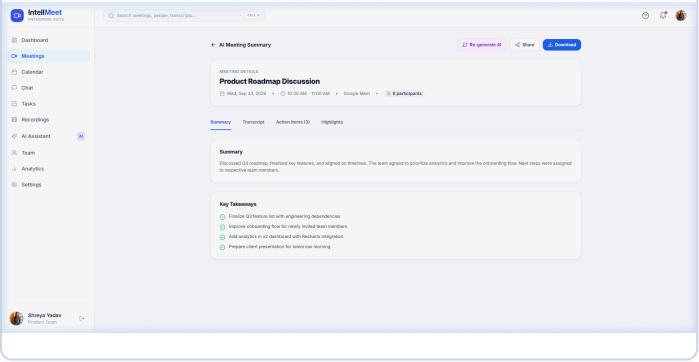

"Now let's examine our core real-time conferencing engine. Launching a meeting initiates an ultra-low-latency WebRTC PeerConnection negotiated via our Socket.io signaling server. The floating bottom HUD provides instant hardware controls: microphone mute, camera toggle, session recording via the MediaRecorder API, and full 1080p screen sharing. The sliding right-hand collaboration drawer provides live room chat and participant presence without disrupting the active video grid."

4 Minute 3:30 – 4:45: AI Meeting Intelligence & Automated Task Conversion

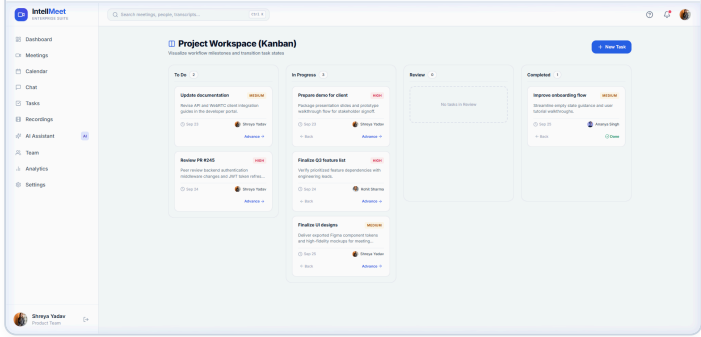

🖥️ EXACT SCREEN ACTION (KIS POINT PAR KYA INTERFACE DIKHANA HAI):

1. [3:30 - 4:05]: Click the red **"End Meeting"** button on the HUD. The application automatically redirects to the **AI Meeting Summary** screen (`/summary/:id`).
2. [4:05 - 4:25]: Point out the structured sections: **Executive Overview**, **Key Discussion Points**, and **Action Items** tagged with assignees and priority badges (High, Medium, Low).
3. [4:25 - 4:45]: Click the green **"Convert to Task"** button next to an action item. A confirmation toast appears: *"Task successfully converted and synced to Kanban board!"*

Interface 1: AI Executive Summary & Takeaways — AI SYNTHESIS

Interface 2: Action Items Extraction & 1-Click Task Sync — TASK INJECTION

🗣️ SPOKEN SCRIPT (HINGLISH - NATURAL & FLUENT):

"Yeh hai IntellMeet ka game-changing capability — AI Meeting Intelligence Engine. Meeting khatam hote hi transcript analyze hoti hai. Humne ek dual-provider architecture build kiya hai: OpenAI GPT-4o-mini primary engine hai, aur agar network issue ya API quota na ho toh built-in heuristic NLP synthesizer failover handle karta hai, taaki app 100% crash-free rahe. AI na sirf executive summary banata hai, balki discussion me se actionable tasks extract karta hai with assignees. Aur sabse best part: bas ek click me 'Convert to Task' dabate hi yeh task team ke Kanban board me live inject ho jata hai!"

🗣️ SPOKEN SCRIPT (ENGLISH ALTERNATIVE):

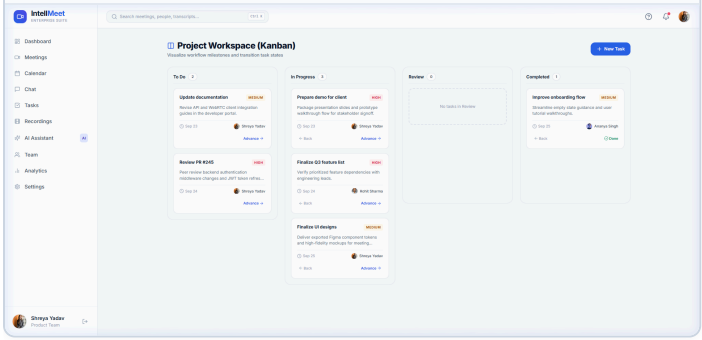

"This represents IntellMeet's flagship capability — the AI Meeting Intelligence Engine. Upon call conclusion, the transcript is synthesized. We built a dual-tier architecture: OpenAI GPT-4o-mini serves as primary, backed by an offline heuristic NLP synthesizer for zero-downtime reliability. The AI generates an executive summary and extracts concrete action items with assignees. Best of all, clicking 'Convert to Task' instantly pushes the action item to the team's Kanban board, completely closing the loop from spoken discussion to task execution!"

5 Minute 4:45 – 6:00: Agile 4-Column Kanban Board & Recordings Archive

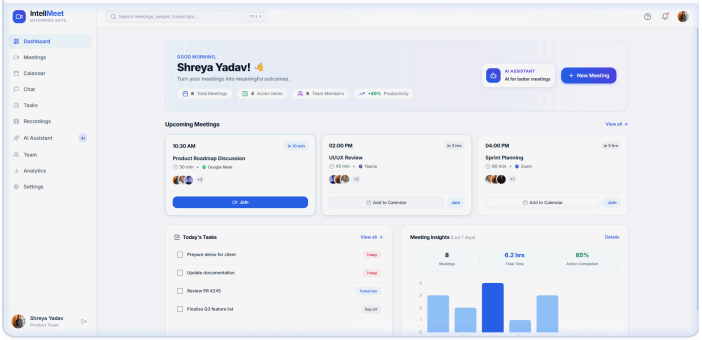

🖥️ EXACT SCREEN ACTION (KIS POINT PAR KYA INTERFACE DIKHANA HAI):

1. [4:45 - 5:25]: Click **"Tasks / Kanban"** on the left sidebar (`/kanban`). Show the 4 workflow columns: **To Do**, **In Progress**, **Review**, and **Completed**. Locate the newly converted action item. Click and drag the card from "To Do" to "In Progress".
2. [5:25 - 6:00]: Click **"Recordings"** on the sidebar (`/recordings`). The recordings archive displays recorded video sessions. Click on a recording card to show in-browser HTML5 video player playback, plus the **"Download WebM"** button.

Interface 1: 4-Column Drag-and-Drop Kanban Board — KANBAN EXECUTION

Interface 2: Recordings Archive & In-Browser Playback — RECORDINGS ARCHIVE

🗣️ SPOKEN SCRIPT (HINGLISH - NATURAL & FLUENT):

"Ab aate hain team productivity aur agile execution flow par. Kanban board par hamare paas 4 clear columns hain: To Do, In Progress, Review, aur Completed. Jo task humne AI summary se convert kiya tha, woh yahan To Do me visible hai. User ise fluidly drag-and-drop karke 'In Progress' me move kar sakta hai, jo instantly MongoDB database me persist ho jata hai. Iske baad Recordings section me hum recorded meetings ko direct in-browser play kar sakte hain ya audit ke liye WebM file download kar sakte hain, ensuring 100% organizational transparency."

🗣️ SPOKEN SCRIPT (ENGLISH ALTERNATIVE):

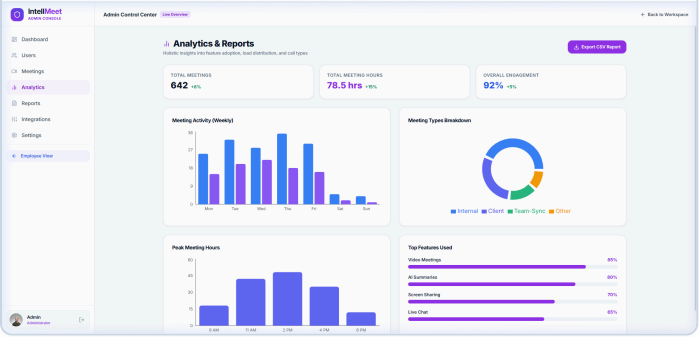

"Moving into agile project execution, our Kanban Board organizes tasks across four lifecycle stages: To Do, In Progress, Review, and Completed. The task converted directly from our AI meeting summary appears in the To Do column. Moving the card into 'In Progress' triggers an optimistic UI update with immediate MongoDB persistence. Furthermore, our Recordings Archive allows team members to play back recorded sessions in-browser or download the WebM container for auditing and training."

6 Minute 6:00 – 7:00: Admin Governance Console, Mobile Responsiveness & Conclusion

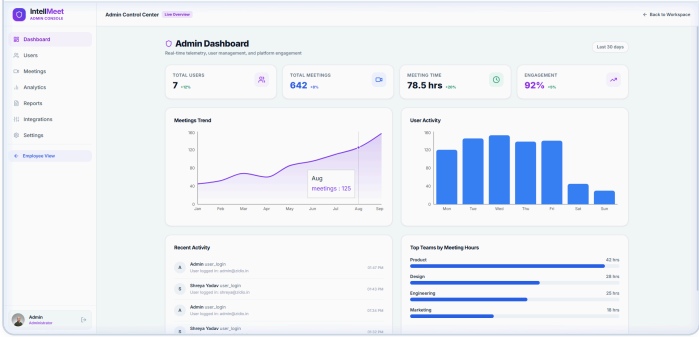

🖥️ EXACT SCREEN ACTION (KIS POINT PAR KYA INTERFACE DIKHANA HAI):

1. [6:00 - 6:30]: Log out and log in as `admin@intellimeet.io`. Open the **Admin Console** (`/admin`). Show the Recharts Meeting Trends area chart, peak hours distribution, and click **"Export CSV"** to show telemetry download.
2. [6:30 - 6:45]: Press **F12 / Ctrl+Shift+M** to toggle Chrome DevTools **Mobile View (iPhone / Android)**. Scroll smoothly, tap the mobile hamburger menu, proving 100% responsive layout.
3. [6:45 - 7:00]: Return to full screen. Show the GitHub repository (`shreyay1310-svg/intelliMeet`) with live link. Deliver the concluding sign-off.

Interface 1: Admin Telemetry & Analytics Dashboard — ADMIN GOVERNANCE

Interface 2: Mobile Responsive View (DevTools F12) — MOBILE RESPONSIVE

🗣️ SPOKEN SCRIPT (HINGLISH - NATURAL & FLUENT):

"Aakhri flow me hum enterprise governance layer dekhte hain. Admin account se log in karne par Admin Console me company-wide telemetry charts, user CRUD, aur 1-click CSV data export milta hai. Mobile compatibility verify karne ke liye main DevTools me Mobile Responsive View toggle karti hoon — aap dekh sakte hain ki layout fluidly adapt hota hai aur saare controls touch-friendly hain. To summarize, IntellMeet ek complete, production-grade MERN platform hai. Yeh video Step 3 Demo Video submission ke liye ready hai. Thank you Zidio team!"

🗣️ SPOKEN SCRIPT (ENGLISH ALTERNATIVE):

"In our final flow, we inspect enterprise governance. Logging in as Administrator unlocks the Admin Console with organization-wide telemetry, user CRUD, role elevation, and CSV export. To verify mobile compatibility, toggling DevTools into mobile view demonstrates full responsiveness across all breakpoints. In conclusion, IntellMeet delivers a production-grade MERN platform uniting WebRTC video, AI intelligence, and agile task execution. Thank you to the Zidio evaluation team!"
